

# **Fully automatic tinning and crimping machine (one side crimping, one side tinning)**

Product Code: GMT-103

CRIMPING MACHINES SERIES

**Automatic Cutting Cable, Stripping Skin, Crimping Terminal, Tinning, All in One Machine**

| Technical Index            | (Tech-Parameters)                                                   |
|----------------------------|---------------------------------------------------------------------|
| Display                    | Touch panel                                                         |
| Function                   | 5-wires cut, stripping, one end crimping, one end twisting, tinning |
| Production rate            | Less than 100mm, 6000~8000pcs                                       |
| Available cable            | AWG18~AWG32                                                         |
| Cutting tolerance          | ±1mm                                                                |
| Cutting Length             | 30~550mm (longer can be customized)                                 |
| Swing arm mode             | Motor                                                               |
| Wire take-up mode          | Pulling arm                                                         |
| Tinning length             | 0.5~9mm                                                             |
| Twisting length            | AWG32~AWG18 (3mm~9mm)                                               |
| Air supply                 | 0.5~0.7MPA                                                          |
| Available terminal         | Continuous vertical or horizontal terminal                          |
| Tool material              | Tungsten steel                                                      |
| Machine Dimensions (L*W*H) | 1210*770*1370mm                                                     |
| Machine Weight             | 450Kg                                                               |
