

Automatic Multi Wire Soldering & Welding Machine, For Circuit Board, Switch, LED Light, Sensors, Aviation Plug.

Product Code: GMT-601

SOLDERING & WELDING MACHINES SERIES

Model GMT-601

Specification	Details
Power	160W
Voltage	220V/50Hz
Working Mode	Electric & Pneumatic
Machine Size	40 x 40 x 45 cm
Net Weight	20 KG

Features:

- Specially designed for welding circuit boards and wiring harnesses, including switches, LED lights, terminals, resistance sensors, thermistors, aviation headers, etc.
- Exact tin output with flexible control, adjustable and automatic tin return function.
- High-quality tin head and welding head ensure reliable performance for long-term use.
- Rolling tin delivery for fast and smooth delivery, reducing the likelihood of jams and increasing convenience.
- Air cylinder pneumatic control for precise operation.
